

# Printing & Folding Directions

## Printing:

Choose just the two pages of the brochure. Click the box to print on both sides, then make sure to select “flip on short edge.”

## Folding:

1. Lay the front of the unfolded brochure facing up.
2. Fold the right panel over the cover. Line up the edge of the paper between the empty space to the left of the center panel.
3. Fold the left panel over the other two panels.
4. Open all the panels back up so it is flat again.
5. Flip the page over.
6. Repeat the previous steps, following the fold lines that were just made.
7. Fold the right panel, and then the left. Flip over again.

This should leave you with the cover panel, the one with “All About”, showing.

What are the best ways to protect yourself and others around you?
